Comments from Brazil on Approval by Mail: Bangladesh - Climate Resilient Infrastructure Improvement in Coastal Zone Project

Dear PPCR Sub Committee Members,

I'd like to believe that the amount requested is necessary to develop a complete study in order to implement the Bangladesh Climate Resilient Infrastructure Improvement in Coastal Zone Project. So, it would be better to prove the US\$600,000 budget with a full description of it's activities, for example: daily expenses, aerial surveys, ...

Best regards.
