**Comments from the United States-- Approval by Mail: SREP Maldives:
Accelerating Sustainable Private Investments in Renewable Energy (ASPIRE)
IBRD**

Dear Patricia,

Thanks to the IBRD for providing helpful answers to our questions on the Maldives ASPIRE proposal in a timely manner. This project has great potential to demonstrate the role distributed solar generation can play in allowing island nations to reduce dependence on fuel imports and move toward cleaner forms of energy production. The United States and Australia support the use of SREP funds for this project.

danny
