

The Program for Results instrument used for this operation has strong focus on Monitoring ~~and~~ Evaluation and Learning. The implementing agency SBI has committed to regularly monitoring the program results framework, including the disbursement linked indicators. SBI will submit unaudited reports on program expenses and results on a semi-annual basis and an audited report for the same variables on an annual basis. Building on this robust M&E framework, the following specific steps are proposed for capturing lessons from implementation:

- 1) ~~1)~~ Regular updating of the program operations manual by SBI as needed, to reflect lessons learned during implementation
- 2) Develop and deliver an appropriate strategy to capture and share results, evaluative evidence and learning both internally and to external agencies.
- 32) Support to MNRE for undertaking consolidation and synthesis of lessons learned from this solar rooftop program as well as those under parallel programs funded by ADB and KfW by MNRE, and systematic sharing of experience amongst all three programs through semi-annual workshops and other relevant activities.
- 43) Identification, synthesis and sharing of lessons as part of reporting at the conclusion of implementation support missions of the World Bank
- 54) Internalization of the lessons of this operation when SBI launches the second phase of the program with its own funds.
