My main concern given low capacity – is who is going to be on the NSC committee and how are they going to be selected? At the moment, the interim NSC is very much dominated by NGOs, and it isn't very clear to me how representative these are of local communities (e.g. working in their interest v representing their interest – different!)

The issue of low capacity is generally well understood throughout the document – I just wasn't too clear on what type of composition we are going to end up with on the NSC – and since the NSC is expected to be set up by October 2016, it would be helpful to have a bit more information on how they are going to ensure they have something representative and/or not overly dominated by NGOs – however well meaning.
