## **SREP PIPELINE MANAGEMENT POLICY COMMENTS AND RESPONSES UNITED STATES COMMENTS**

## **I. Comments From The United States (February 21, 2017)**

Zhihong and CIF AU team,

Thanks for sending the answers to previous questions sent from other Sub-committee members. Here are some additional questions from us:

- Please explain the process for operationalizing the proposed pipeline management plan. The policy paper did not include decision text, so it's unclear to me how we will take a decision to adopt the management policy. Will you want the Subcommittee to take a decision tomorrow? If so, do you have draft decision language you can share beforehand?
- We see that you are planning to present a more thorough plan for the split sealed pipeline in June. Can you please give us a sense of how that proposal will look? Most projects in the sealed and reserve pipeline require some grant financing. How will the non-grant sealed pipeline function if all grant funding has already been allocated by June, as is now projected?

Looking forward to speaking with you all tomorrow.

danny
