**Comments from the United Kingdom  
Egypt: Wind Power Development Project**

Dear Patricia,

With respect to the Egypt: Wind Power Development Project we recommend that the proposal for CTF funding envelope of up to US\$ 150 million is supported.

Please note that our support is on the understanding that additional developmental and poverty reduction benefits will be quantified with clearly defined, poverty related baselines, results and indicators set out in the project documents prior to Board approval.

We would also like to note our appreciation of the work that has been done to tighten the project results over the past few weeks.

Kind regards,

Simon
