**Comments from Germany on the approval by mail of CTF funding for IDB and IFC's
Colombia Sustainable Energy Finance Program**

Dear Patricia,

We are happy to join others in welcoming the CTF Colombia Sustainable Energy Finance Programme.

The proposal appears well reasoned, well written and thought through. The program concept appropriately undertakes to increasing the scale of energy-efficiency lending. We agree that the use of the risk sharing facility is very appropriate under the given conditions.

I wish you all a peaceful and joyful Christmas season and an exciting and promising start into 2011!

Kind regards,
Annette
