Subject: **Ang. Turkey: Commercializing Sustainable Energy Finance Program**

Thanks again to the CIF AU for presenting us with a clear and concise description of this project. We have looked closely at it and we believe it is a sound and well-motivated intervention.

I do however have one question about the project. Although we are generally supportive of the financial intermediary approach, we would be concerned if the same two banks as in the previous project were to be used in this project. Is important that RE/EE competence is spread across the Turkish financial sector. Would you be able to confirm that other FIs than TKB and TSKB will be involved in this project, and if this is not the case explain why the same institutions would be used again.

Thank you in advance.

Yours sincerely,
Carly Jönsson
